

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

1. (Previously Presented) A method for remotely operating a medical diagnostic imaging system, said method comprising:

moving a trackball in a handheld trackball device;

translating movement of said trackball to a command for execution at said medical diagnostic imaging system;

transmitting said command based on movement of said trackball to said medical diagnostic imaging system from said handheld trackball device; and

executing said command at said medical diagnostic imaging system, wherein said command comprises adjusting a setting or function of said medical diagnostic imaging system based on said command.

2. (Original) The method of claim 1, wherein said transmitting step further comprises wireless transmission of said command to said imaging system.

3. (Currently Amended) The method of claim 1, ~~wherein said moving step further comprises at least one of rolling and~~ comprising transmitting a command based on clicking said trackball.

4. (Original) The method of claim 1, wherein said trackball comprises a wheel on a mousing device.

5. (Original) The method of claim 1, further comprising controlling said imaging system using at least one of a voice command, a foot switch, and a remote keypad.

6. (Original) The method of claim 1, further comprising pressing a button on said handheld trackball device to trigger an imaging system command.

7. (Previously Presented) A handheld trackball device for controlling a medical diagnostic imaging system, said device comprising:

a trackball for controlling said medical diagnostic imaging system based on motion of said trackball;

a transmitter for transmitting a command to said medical diagnostic imaging system based on motion of said trackball, said command generated through translation of said motion of said trackball to a command for execution at said medical diagnostic imaging system; and

a housing for holding said trackball and said transmitter.

8. (Original) The device of claim 7, further comprising a button for controlling an imaging system function.

9. (Original) The device of claim 7, wherein said trackball device works with voice commands to control said imaging system.

10. (Original) The device of claim 7, wherein said trackball comprises a wheel on a mousing device.

11. (Original) The device of claim 7, wherein said device works with at least one of a voice command, a foot switch, and a remote keypad to control said imaging system.

12. (Original) The device of claim 7, wherein said handheld trackball device comprises a wireless handheld trackball device.

13. (Previously Presented) A remote mousing device for operating a medical diagnostic imaging system, said device comprising:

a moveable portion for operating said medical diagnostic imaging system based on motion of said moveable portion; and

a transmitter for transmitting a command to said medical diagnostic imaging system based on said moveable portion, said command generated through translation of motion of said moveable portion to a command for execution at said medical diagnostic imaging system.

14. (Original) The mousing device of claim 13, wherein said moveable portion comprises at least one of a trackball, a wheel, and a joystick.

15. (Original) The mousing device of claim 13, further comprising an additional input receptor.

16. (Original) The mousing device of claim 15, wherein said additional input receptor comprises at least one of a button, a switch, and a touch screen.

17. (Original) The mousing device of claim 13, wherein said mousing device works with at least one of a voice command, a foot switch, and a remote keypad to control said imaging system.

18. (Original) The mousing device of claim 13, wherein said mousing device comprises a wireless mousing device.

19. (Original) The mousing device of claim 13, wherein said mousing device comprises a handheld mousing device.

20. (Original) The mousing device of claim 13, further comprising a fastener for affixing said mousing device to at least one of an operator and a subject being imaged.

21. (Original) The mousing device of claim 13, wherein said mousing device is integrated with an instrument.

22. (Original) The mousing device of claim 22, wherein said instrument comprises at least one of an imaging instrument and a medical instrument.
